

● PURCHASE LARP

When AI starts buying, who holds the keys?

Agentic Procurement & the XRPL Digital Safe

INTENT

POLICY

PURCHASE

SETTLE

A recommendation is not spending authority.

Wrong recipient. Broken budget. No delivery.

Procurement autonomy—with financial boundaries.

Discover → compare → authorize → settle

● HOW IT WORKS

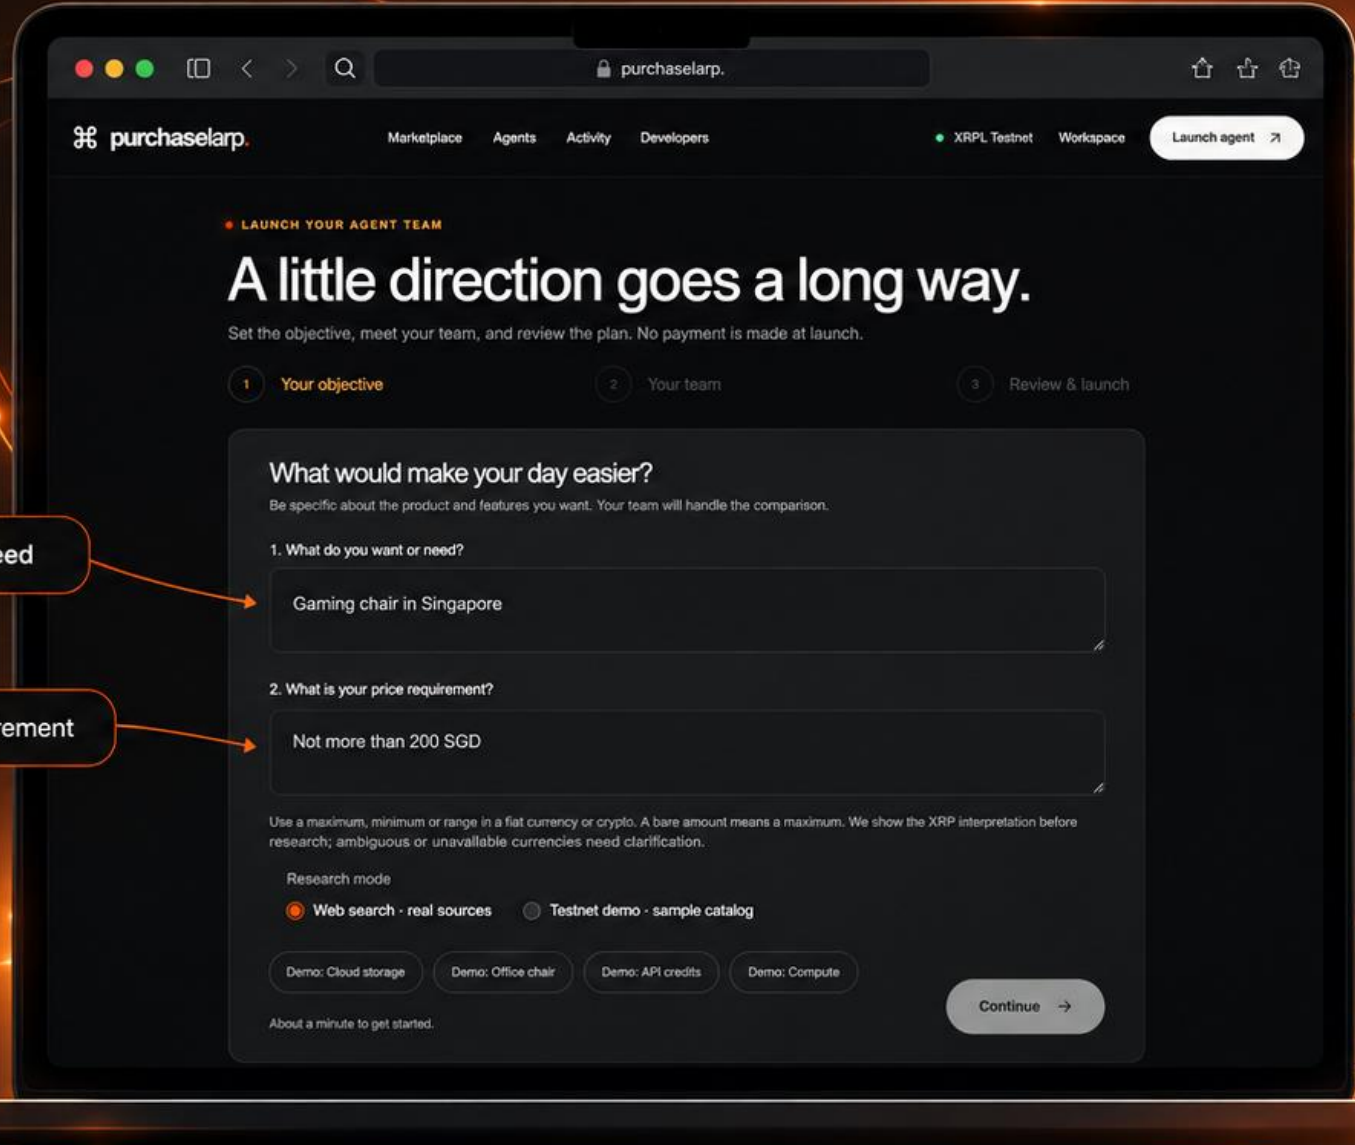

Describe the need. Set the money boundary.

"Gaming chair in Singapore"
"Not more than 200 SGD"

Converted to XRP · ambiguity rejected · no payment during research

1 Need

2 Price requirement

● LAUNCH YOUR AGENT TEAM

A little direction goes a long way.

Set the objective, meet your team, and review the plan. No payment is made at launch.

1 Your objective 2 Your team 3 Review & launch

What would make your day easier?
Be specific about the product and features you want. Your team will handle the comparison.

1. What do you want or need?

Gaming chair in Singapore

2. What is your price requirement?

Not more than 200 SGD

Use a maximum, minimum or range in a fiat currency or crypto. A bare amount means a maximum. We show the XRP interpretation before research; ambiguous or unavailable currencies need clarification.
